Skills and practice

- **Hands-on · PC hardware.** PC assembly and rebuilding, power supply repairs, fan lubrication and classroom equipment inventory at Potencial Training Center.
- **Practical exposure · 1C and Windows Server.** Worked with 1C databases and Windows Server at the training center. I also assemble, maintain and troubleshoot personal PCs.
- **Learning · operating systems and virtualization.** I am learning Windows, Linux including Debian, and virtualization.
- **Hands-on · documentation.** Prepared a roles and permissions guide and a knowledge base structure for O!task. Software projects give me practice working with source code and technical documentation, with AI assistance.

Experience

Potencial Training Center

Oct 2024–Aug 2026

PC hardware work

Worked on classroom computer equipment, 1C databases and Windows Server at the training center.

- Assembled and reassembled more than 50 computers.
- Inventoried computer equipment in classrooms.

O!task

Jan–Aug 2026

Junior Product / Growth Specialist

Prepared user documentation and structured product information. Handled partner communications.

- Prepared a role matrix; the roles and permissions guide was published on the O!task website and the knowledge base structure was adopted.

Web Do

2026 · ended in Aug

Business Development / Presale Specialist

Prepared audit documents and client correspondence, maintained CRM records and handed conversations to sales.

- Prepared 15 site UX audits — current problems, proposed changes and references — as the starting point for a presale conversation with a prospect.
- Created reusable audit and presale document templates.

Education

Yekaterinburg College of Economics and Technology (EETC), 09.02.07 Information Systems and Programming. Secondary vocational education, 2026.

Software project

TaskFocus - a solo diploma project built with AI agents. A task planner with an inbox, daily task cap, authentication, and architecture and setup documentation. github.com/Simifar/taskfocus
